VITA PLUS 1-1-2

Fuel your plants with natural organics and minerals. Vita plus is loaded with macro and micro nutrients that help your plants develop strong roots, sturdy green stems, and stunning flowers. High in chelators, Vita Plus makes it especially easy for plants to absorb elements like calcium. Vita Plus can be used as a full cycle supplement anytime to promote plant health and vigour.

For veg stage, use 2-4 ml per litre.

Derived From: Potassium Phosphates, Potassium Nitrate, potassium Humates, Ammonium Nitrate, Thiamine Mononitrate, Magnesium Sulfate, Iron EDTA, Zinc EDTA, Thiamine Mononitrate. Also contains non-plant food ingredients: Vitamin B1 0.1%

GROWTH BOMB 0.5-4-5

Growth Bomb is your plant's best friend. It contains natural kelp extract that plants seriously love. Marine kelp is packed with growth hormones like cytokinins, auxins, and gibberellins that promote cell wall growth and expansion. Your plants will be lush and green, and you will see accelerated growth. It's kind of like when Mario eats the red mushroom and immediately grows bigger and stronger - the same will happen when you introduce your plants to Growth Bomb.

For veg stage, use 3 ml per litre. For flower stage, use 1 ml per litre.

Derived From: Ascophyllum Nodosum kelp extract, Ammonium Phosphates, potassium Phosphates.

CAL MAGGIE 2-0-0

Cal Maggie provides optimal ratios of calcium, magnesium, and iron that are critical for strong vascular plant growth. Calcium not only helps build new cell walls, it also activates enzymes to actively pump growth hormones instructing your plants to keep on growing. Calcium can prevent tip burn in lettuce and blossom end rot in tomatoes. Magnesium on the other hand, is the central element in chlorophyll that makes plants green. Combined together as a power couple - Cal Maggie help plants absorb water and nutrients like a sponge!

For veg and flower stage, add about 2 ml per litre to your regular nutrient solution.

Derived From: Calcium Nitrate, Magnesium Nitrate, Iron EDTA.

QUEEN BEE 1-2-3

Increase your plant's immune system with QUEEN BEE. B-Vitamins are important for plant metabolism and growth. With QUEEN BEE, you will see enhanced root zone growth, floral development and ripening. In addition, under stressful conditions like drought, heat, and salt stress, B-vitamins help plants recover quickly, preventing plants from shutting down and going semi-dormant. A few drops of Queen bee is also great for cloning and treating transplant shock.

For veg and flower stage, add about 2 ml per litre to your regular nutrient solution.

Derived From: Ascophyllum Nodosum kelp, cold processed Macrocystis Integrifolia kelp, Potassium Humate, Thiamine Mononitrate, Ammonium Phosphates, Potassium Phosphates, Potassium Nitrate, Urea. Also contains non-plant food ingredients: Vitamin B1 0.1% Humic Acids 0.1% Amino Acids derived from kelp: Glutamic Acid, Aspartic Acid, Arginine, Alanine, Glycine, Leucine, Lysine, Valine, Serine, Phenylalanine, Isoleucine, Histidine, proline Threonine, Tyrosine, Methionine, Cystine. Carbohydrates derived from kelp: Alginate Acid, Mannitol, Laminarin.

CARB BONBON

Energize your plants with Carb Bonbon. Just like us, plants burn carbohydrates to produce energy for active growth, reproduction, and cellular repair. Carb Bonbon provides simple and complex carbs to feed beneficial microorganisms in the roots, allowing plants to conserve its sugars for fruit and flower production. The addition of supplemental carbs also improves the uptake of important trace elements like iron, manganese, copper, and zinc. Carb Bonbon will invigorate your plants with a burst of energy and fuel. Sweet juicy buds for the win!

For veg and flower stage, add about 2 ml per litre to your regular nutrient solution.

Derived From: Glucose, Fructose, Maltose, Xylose.

Actual dosage depends on plant condition and strain. Consult our professionals for details.

Bud Life

BUD LIFE 0-39-25

Bud Life ramps up the number of flowering sites per plant for maximum harvest. During the early bloom stage, plants are phosphorus and potassium thirsty. Bud Life satiates this hunger with the ideal ratio of potassium and phosphorus, triggering the early production of budding sites. The extra boost of these elements also work towards brewing essential oils and flavoring compounds that make your crops aromatic and tasty.

For flower stage, add 2 ml per litre to your regular nutrient solution.

Derived From : Potassium Phosphates, Magnesium phosphates, Magnesium EDTA.

Notorious Bloom

Notorious Bloom 0-50-30

Notorious Bloom guarantees a notorious yield. Our special formula contains heaping doses of phosphorus and potassium to increase flower and fruit size. The perfect mix of amino acids stimulate enzyme activity and protein synthesis to ramp up flower production. You will get large flower clusters, bright colours, robust flavors, and extended shelf life. Last but not least, Notorious Bloom is loaded with many other beneficial nutrients that will send your harvest over the moon.

For veg stage, use 3 ml per litre. For flower stage, use 1 ml per litre.

Derived From: Potassium Phosphates, Magnesium Phosphates, Magnesium Sulfate.

Hulk It

HULKIT 1-5-4

Unleash the hulk in your buds. Hulk It boosts your bloom to produce large dense flowers with more essential oils, terpenes, resins, and phenols. Our premium bud-bulking formula activates L-amino acids to release growth hormones for flower development. Use Hulk It during your late flowering phase to maximize volume and weight. Your buds will swell with potency and pride.

For veg and flower stage, add about 2 ml per litre to your regular nutrient solution.

Derived From: Potassium Nitrate, Potassium Phosphates, Magnesium Phosphates, Ammonium phosphates, Phosphoric acid, Potassium Humate, Ascophyllum Nodosum Extract, Magnesium sulfate.

BUD DETOX

BUD DETOX

Since the day your plants were born, they have been busy absorbing nutrients to grow and impress you. Over time, your plants will have accumulated excess nutrient salts that deteriorate the taste, aroma, and quality of your buds. Think about buds that won't stay lit, or buds that burn black ash and make you cough violently. Bud Detox treats your plants to a spa day. It breaks down and flushes out the buildup of residual salts and minerals, leaving your plants feeling "so fresh and so clean clean." But Detox can also be used anytime to treat nutrient lockout as well. the result? Your buds will be nourished, aromatic, and smooth.

Final Rinse: Use 2 ml per litre of water. Overfeeding Correction: Flush plants with 2 ml per litre of water.

Derived From: Citric Acid, Fulvates, Carbohydrates.

QG BLACK & QC GOLD

QG BLACK and QG GOLD contain mother nature's favorite chelators- humic and fulvic acids. Our specially-crafted formulas allow for easy absorption of minerals and trace elements that seriously stimulate plant metabolism and growth. Your plants will also have better resistance to environmental stress factors

For veg and flower stage, add about 2-3 ml per litre to your regular nutrient solution.

Quick Grow Part 1

1-2-5

Contains: H₂O, F₂, G₂
(Net Weight: 100g/3.5oz)

Quick Mix Part 2

2-0-0

Contains: H₂O, F₂, G₂
(Net Weight: 100g/3.5oz)

Quick Bloom Part 3

0-4-4

Contains: H₂O, F₂, G₂
(Net Weight: 100g/3.5oz)

3-PART BASE NUTRIENT SERIES GROW, MICRO AND BLOOM

Nourishes your plants with high quality nitrogen, phosphorus, and potassium to help your plants flourish. Our base nutrients are complete with trace elements like magnesium cobalt, and molybdenum, as well as chelated micronutrients like copper, manganese, iron and zinc. Our nutrients are formulated by award-winning Master Growers, and hand-mixed in small batches to ensure quality.
